

synchr®

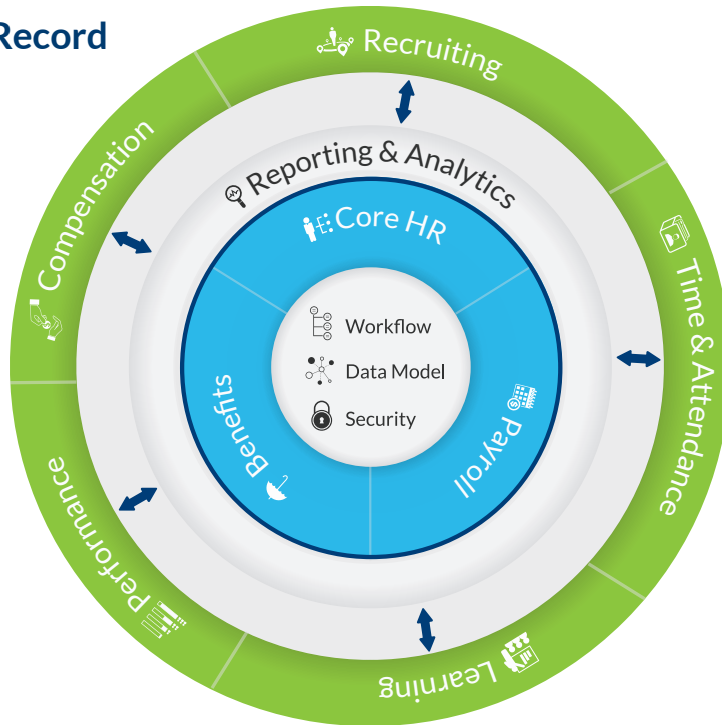

Human Capital Management Platform

Redefining + Simplifying HCM for Mid-Market Companies

Synchr's patented, enterprise-class technology is redefining and simplifying HCM for mid-market companies (250-5000 employees). It provides critical advantages not found in traditional systems by automating HR, benefits, and payroll processes, balancing the distribution of work, and centralizing data to ensure accuracy at all times. The breadth and depth of automation Synchr® delivers is unparalleled and ushers in new levels of innovation not seen before.

Single Core System of Record

(Core HR, Benefits, Payroll, Reporting & Analytics)

Core HR

- Person & Position Management
- Smart Workflow
- Dynamic Org Chart
- Document Storage
- Total Compensation
- Applicant Management
- Onboarding

Payroll

- Non-Linear Payroll
- Smart Tax Configuration
- Mass Pay Entry
- Mid-Period Changes
- Retro-Pay Calculations
- General Ledger Integration
- Self-Balanced Journal Entries

Benefits

- Self-Managed Life Events
- Rules-Based Benefits Administration
- Enrollment Assistance
- Carrier Integration
- Automated EOI
- Benefits Inheritance
- ACA Compliance & Reporting

Reporting & Analytics

- Standard Reports Library
- Ad-Hoc Reporting
- Dashboard Builder
- Drag & Drop Editing
- Date-Based Relational Data
- Custom Data Extracts
- Real-Time Access

Why SyncHR

Native Cloud-Based Design
Reduces IT involvement, requires less support & enables stronger security

Ecosystem Friendly
Align your business decision makers by sharing real-time data between critical systems

Single System of Record for Core HR, Benefits & Payroll Employee Data
Supports superior data accuracy & real-time access to data across an organization

Smart Workflows
Dynamically adapt as people move in, out & around your organization

Person & Position Autonomy
Enable “true” budget to actual headcount reporting

Reporting & Analytics
Unprecedented data accuracy enabling true business insights

User-Centric
Intuitive interface increases adoption & engagement, regardless of role

Non-Linear Payroll Processing
Revolutionary approach to payroll, resulting in accurate results every time & the elimination of manual calculations

Distributed Process Flows
Improve quality & timeliness of data via entry at the source thereby eliminating administrative redundancy

Implementation Services
Designated team works with you through the implementation journey following our proven methodology and processes

Unparalleled Automation
Improve data confidence by automating all calculations-past, current & future

Customer Care
Designated customer success manager who is part of your implementation & available to help you achieve ongoing success

HR

Move beyond just automating your paper processes with a platform that does the work for you, so you can focus on your people.

IT

Eliminate the need to maintain an HCM system but retain the ability to access the data your other systems need.

Finance

Remove manual preparation of journal entries with a system that provides a self-balancing, summarized sub-ledger.

C-Suite

Enhance decisions through improved business insight from real-time reporting, with data you trust.
